

BEST EXHIBITION GROUNDS IN WEST

Directors of Edmonton Exhibition Association Inspect Work Done at New Park

Under the direction of Manager Harrison a small army of workmen engaged in the Edmonton Exhibition Association's efforts to a wonderful transformation at the new exhibition park in the northeast end of the city. The work has been done in a scrub to a beautiful park and modernly arranged exhibition grounds the character of which Harrison said commenced at the opening of spring has been marvelous. Hundreds of people have come to inspect the work and have seen buildings going up over night, driveways laid out in a day, and roads made from gravel evolved from impenetrable brushy parks.

The new grounds, which extend about two acres, are surrounded by a high, high fence surmounted with three rows of barbed wire.

A large building, which is situated to the right of the main entrance, and near the race track building, is the new stables. The stand is just being commenced. The stand will be 200 feet in length and 40 feet wide, with a seating capacity of 4,000. The cost is estimated at about \$2,000.

Near the track there is one racing track completed. It is 100 feet long and the other tracks of the same kind are now under construction. To the left of the race track as you enter the grounds is the new west side and extending south at intervals of 80 feet, six cattle sheds are under construction. Two of them are almost completed and the other two are well under way. These sheds are 100 feet long and extend out in a way that insures a sanitary condition for all conditions.

A sheep and hog farm are also under construction, the foundations for eight sheep houses are numbered 100 to 107, and the carpentry work will be commenced shortly. In these different sheds and sheds there will be stalls for 200 head of cattle, 200 head of horses, 400 sheep and swine.

Crossing the entrance to one side is the superintendent's cottage, a fine modern little building, and on the other side is a stable and a stock building, which is practically finished off.

The cost of the show stands, stock buildings, stables and superintendent's cottage will be about \$5,000.

Work on the Park

The work done on the public park which is situated just outside of the grounds is also progressing rapidly. The ground has been cleared of brush and the athletic grounds have been leveled, the picnic tables and many go-rounds have also been built.

The cost of the park so far has been about \$5,000. Advantage is to be taken of the natural character of the land, which consists of a fair large sloping area, one situated in the park and the other in the exhibition grounds. The water of the artificial lakes, the water being supplied and kept fresh by underground pipes. These lakes will be surrounded by trees and ferns and flowers will be planted.

Also all these buildings and improvements have been made on the understanding that they will be done before Edmonton gets into the position of having the best equipped fair grounds in the West.

A temporary building, a horticultural hall, and a dairy building will be erected during the near future, while a laundry room, wash house, a paddock, sheds, dining halls, fire halls and a police station will be rushed into service.

Other buildings such as store houses, band stands, a directors office, station buildings, a post office, a telegraph office, platforms, side walks, etc., will also be constructed before the pavilion is completed.

The cost of all these smaller buildings is estimated at about \$3,000.

The cost of the entire park when installed will cost another additional \$10,000.

Success of Fair in View

In all the business arising out of the boasting buying and laying out of the new exhibition grounds the Association have not lost sight of the success of the fair as a drawing card.

The Canadian Poultry and Sheep and Swine Breeders Association has been formed and grants have been obtained from the Jersey Club, the Association, Canadian Jersey Club, The Clydesdale Horse Association, of Canada, The Royal Agricultural Association of Canada, and The International Stock Company.

The horse racing of the fair will be of the best. Contests with the Hand People, Harness, etc., for horses have been signed up, and Mr. A.G. Barnes shows people have engaged the grounds for their high class contests.

In regard to racing the Edmonton Trotting Club has been inaugurated and admission fees have been fixed for the races.

At the present time things are looking very fair this year promises to be the biggest success of its kind in Western Canada.

QUESTION OF PRECEDENCE

Man Arrested in Winnipeg Wanted in Several Places.

Winnipeg, June 18.—An important point of procedure has been referred to the attorney general here. It appears a young man named Goldberg has been arrested in Edmonton, Forties La Prairie and Winnipeg without unduly troubling the law officers. On the other hand he was arrested here but where he will be tried first depends on the attorney general's department.

FIVE BY LAWS TO BE VOTED UPON MONDAY

Three Are Money Bylaws Authorizing Debentures to be Issued for \$275,000. The Other Two Are to Grant Finance to Banff and Gas Companies.

On Monday next the ratepayers of Edmonton will be called upon to endorse or reject three money bylaws debentures totaling \$275,000 in amount, and two others to grant finance which will be required for a radial company and to lay gas pipes from the proposed manufacturer of the Finch Gas Co. to the railway yards of the city.

The Money Bylaws.

Bylaw No. 230 is one to provide the sum of \$75,000 to supplement the sum of \$75,000 granted by bylaw No. 24 for the purpose of improving and laying out the East End park and erecting a bandstand thereon. The bylaw on the matter has been referred to the City Council for a final decision.

Bylaw No. 231 is one to provide for the raising of the further sum of \$175,000 to be paid to the City board of Trade for the purpose of laying gas pipes from Athabasca Landing on route to Edmonton.

COUNCIL OF WOMEN.

The Council of Women held on Thursday in the YMCA, Mrs. Blanche Robinson, president, presided.

Committees on public health was given a discussion followed by a vote.

Bylaw No. 232 is one to provide for the laying of the further sum of \$175,000 to be paid to the City board of Trade for the purpose of laying gas pipes from Athabasca Landing on route to Edmonton.

Bylaw No. 233 is one to provide for a site to be purchased for a school to be erected on Northwood Avenue, by a vote of 1,000 to 1,000.

The extensive home for school children was also discussed. The school children were invited. The quarterly meeting will be in October.

GRANTING FRANCHISES.

The bylaws to grant franchises are numbered 234 to 238.

Bylaw No. 237 is a bylaw to grant to the French Compressing company, a franchise for eight years to supply natural gas for the lighting of railroad coaches by laying pipes along the line of the Canadian Pacific Railway.

No franchise is given to the Canadian Northern Railway for laying pipes along the line of the Canadian Northern.

Bylaw No. 238 is a bylaw to grant to the Canadian Northern Railway a franchise for laying pipes along the line of the Canadian Northern.

No franchise is given to the Canadian Northern Railway for laying pipes along the line of the Canadian Northern.

\$9,000 FOR GRANDE PRAIRIE HIGHWAY

Settlers of the North Country Will Build Their Own Road Out

The settlers of Grande Prairie are working to lay out a direct road through the timber belt to the line of the Great Trunk Pacific Railway this summer. This is the news which George M. Smith, of Jasper Place, has received from his son, who is now living in Grande Prairie.

Mr. Smith, Jr., one of a party of four chosen by the settlers to locate the line of the road which is to run in a north-easterly direction from Flying Fish Lake following the trail to Jasper House and coming out either at that point or at Medicine Lodge.

The settlers of Grande Prairie are said to have expended \$1,000 in cash or services towards the cost of constructing the road. The work of clearing the timber will follow the location, beginning about the middle of July.

The road to the Grande Prairie settlers has been taken as a result of the refusal of the government to contribute to the construction of the roads of the members for the northern constituents as to the necessity for building the road west of Grande Prairie and the Lesser Slave Lake country. Every effort to secure money for road construction from the government was met with a blank refusal, the statement being made that the settlers would have to wait to receive consideration until the more settled portions of the province were reached.

This spring the Peace River and Grande Prairie settlers lost thousands of dollars worth of their property because there were no roads into that country from Edmonton. It will be recalled that the severe winter weather came very early and caught many settlers on their way north, the snow being so deep that they could not see their sledges. At a result of the impassable condition of the roads, told them to turn back, and they were compelled to leave considerable of their goods by the roadside to be picked up later.

The Grande Prairie men have finally taken the bull by the horns and have organized a road-building company. They will build their own road and will be under no obligation to the government.

The city of Edmonton, according to the statement of one of the Grande Prairie settlers, is in a position at the present time, stands to lose by the action of the settlers in turning to the building of a road to the point on the Grand Trunk Pacific. The settlers would have preferred a road to Edmonton, but the fact is that they have found it necessary to build it themselves, since the nearest point on the Grand Trunk Pacific, which point is in consequence, will be far from the bordering point for the north country.

JIM PATTEN COTTON CROWD IS INDICTED

Men Who Were Involved in Cotton Plot Must Stand Trial Under Criminal Clause of Sherman Anti-Trust Law. Bail Fixed at \$5,000 Each.

New York, June 17.—James A. Patten, the big Chicago banker, and the who was involved in the plot associated with him in the cotton pool, were indicted yesterday afternoon. W. F. Clegg, W. P. Brown of New Orleans, Eugene G. Schuster, Tom Sturges, J. H. H. M. Thompson and Charles E. Kittell, of New York; Morris E. Rothchild of Massachusetts.

The indictment was handed to John Dougall in U. S. Court at 1 p.m. this afternoon. The defendants were represented by John C. St. John, James J. O'Farrell, C. C. Coffey, Colston Robt. P. Thompson, one of the indicted men, was strongly urged to appear before the court, but did not do so. T. T. T. was forming his cabinet. He is a South Carolinian and for many years was prominent in politics. When he was brought to New York to occupy an independent position with the New York Life Insurance Company.

THE EDINBURGH CONFERENCE
Emphasizes Need For Effort To Counteract Mohammedan Influence.

Edinburgh, June 17.—The World's Christian Conference, held in great from Marano, Mammesini, Catholic Bishop of Cremona, Italy, was real. The delegates heard also the report of "Uncommon Education" in the relation of the Christians to the Moslems. An audience crowded three of the largest halls in the city at the same time to prove the big success of the conference.

The Rev. John Timothy St. John, of the Fourth Presbyterian Church, delivered a short and stirring address on a subject of world-wide importance, calling the attention of the conference to the work of Mohammedanism among the pagans of eastern Asia. The Mohammedans are now penetrating into the great provinces of Darfur and Kordofan. They sail also into northern Nigeria. The British government is working to support its subjects there, but a single Christian missionary is not a single Christian missionary in those districts.

KAISER WILHELM HAS A SORE KNEE

Berlin, June 17.—Some uneasiness is expressed over the Emperor being ordered to take a complete rest by his surgeon, as the Emperor's knee was sore yesterday and gradually grew worse. The doctor, who was called in, is not serious, says the doctor, a man of the highest rank, but the public is uneasy, remembering the recent absences on the Kaiser's hand.

IMPOSING FUNERAL IN MONTREAL TODAY

Ten Victims of Herald Disaster to Be Buried—Joint Ceremony by Ministers of Various Denominations—Great Exhibition of Public Sorrow.

Montreal, June 17.—An imposing funeral will be held tomorrow afternoon, when ten victims of the Herald disaster will be buried at Mount Royal and Cote Des Neiges cemetery for interment.

It is expected that that will be one of the greatest exhibitions of public grief that has occurred in Canada for many years. The funeral service will be headed by a squad of mounted police, with a company of fifty constabulary in parade state, while the band of the Princess of Wales' Fusiliers, with their band, and a firing party, in honor of color sergeant D. J. Miller.

The mayor and corporation will be represented, as well as the Knights of Pythias, Sons of England, and many other societies.

A joint ceremony will be held by ministers of the various denominations who will be present, and will be escorted to the cemetery, the caskets dead being buried at Mount Royal and Cote Des Neiges cemetery. Several other victims were also buried today.

GIGANTIC FRAUD MAY BE EXPOSED

Manipulation of Grains at Head of Lakes May Lead to Complete Enforcement Control of Terminal Elevators—Commissioner Takes Action.

Port Arthur, Ont., June 17.—A first class sensation was sprung in elevator circles at the head of the lakes today when it was learned that the Commissioner of Trade had sealed up the bins on several of the terminal elevators, and that an investigation will probably be the proving of a gigantic system of manipulation of grains. It is known that the grain market has been manipulated for years, but it is rumored that the operations have netted millions in the ring. What the affair is all about is the fact that Mr. Castle is taking any detail to any, and has no personal stake in it.

Just what discoveries will be made is not known, but the secret financial contents of bins is the subject of interested speculation. Prominent opinion is that the result of the investigation will be that the Dominions government will shortly step in and take over all the terminal elevators.

DOUBLE DROWNING FATALITY.

Ferry Strikes Launch in Toronto Bay Two Women Drown.

Toronto, June 17.—A double drowning occurred in the bay late tonight, when a gasoline launch was struck by a ferry and overturned. The victims are Mrs. Mabel McNeil, aged twenty-five, and Miss Emma Watson, twenty-three, her sister. The Hon. H. H. Ferguson, Mayor, and his wife, Mr. and Mrs. Ferguson, Captain of the ferry, and the launch and reversed the engines and got away again. Just as the ferry moved forward, the boat began to move back and was hit. The ferry crew rescued the men.

BETTER TROOPS NEVER BORE ARMS ANYWHERE

Soldiers Encamped in Calgary Are Equal to Best in Physique—Good Horsemanship and Many Expert Shoots—Inclusion of Work Life-Hard Work Drilling All Day.

Calgary, June 17.—That the brigade of nearly 1,200 volunteers soldiers now camped in the hills above the city are equal in physique of any similar body of troops in the world is believed by every man who has seen them. Any number of men who have had little time for drill and instruction, they are somewhat deficient in the former, but the men are trained, but as a football coach would say: "The raw material is there."

Major St. John, one of the officers from Edmonton, who just returned from a visit to London, where he saw the Queen, said yesterday that most of the men in the line there were the best products camped on the Bow. It is also probable true that a better body of troops has never gathered together in a volunteer cavalry brigade, possibly excepting Ross's Guards, probably the best in the world.

Officers who are familiar with volunteer cavalry troops in Eastern Canada are agreed that the Alberta lads compare to them. The Alberta lads as compared to them, this is a great factor in making such a fine training of the men. They know how to take care of their horses themselves. Besides, most of them are from the West, and therefore are more crack shots. Thus the two really important requirements of a cavalry unit are that the horses are possessed by the men already.

Officers who are familiar with volunteer cavalry troops in Eastern Canada are agreed that the Alberta lads compare to them. The Alberta lads as compared to them, this is a great factor in making such a fine training of the men. They know how to take care of their horses themselves. Besides, most of them are from the West, and therefore are more crack shots. Thus the two really important requirements of a cavalry unit are that the horses are possessed by the men already.

And in this connection mention should be made of the horses. It is wonderful how easily they fall into the habits of the cavalry animals. In fact, the horses are more easily broken in than the riders. When they don't swing into line, poverty or become too fat, they are easily broken in.

They know how to use their spurs, that is to the horses. Now, notice the water-pans must be correctly placed to be of any real use. If it is placed near the furnace (see lower illustration) the moisture has a long route (see arrows) to travel before it reaches the pipes leading to the registers. You can see that the heat from the furnace dries out nearly every particle of moisture ascending from the pan. Very little reaches the pipes or passes

now. Notice the location of the Sunshine water-pans. It is placed over the fuel door. The moisture takes the short, direct route to the pipes leading to the registers. Never put off till to-morrow
what should be done today, so buy at once a
pound packet of

BLUE RIBBON TEA

and give it a trial. Your grocer will refund money if it is not superior to the tea you have been using.

SOCIETY IN THE CAPITAL

By GERTRUDE SETON THOMPSON.

TWO JUNE WEDDINGS.

Heffernan-Graves Nuptials.

The marriage of Miss Edna Gravé

and Mr. W. S. Heffernan took place

on Wednesday morning at 296

Fifth street, and was exceedingly

private and well arranged.

Miss Gravé's coat and invitation

was everywhere decorated with pointed

petals and greenery.

Her bouquet was a single

pink rose. Mr. A. E. Farmer was

best man.

After the ceremony, which was

performed by Rev. Father Naisseus,

the bridal party left for the Hotel

Metropole. There were the large

upper drawing-rooms, beautifully

arranged and decorated.

The tea party buffet luncheon

was served, speeches made and

headings given.

The cake, which had a place

of honor on the table, with huge

bouquets of flowers on either

side, was cut.

The roses were afterwards

distributed to the guests. Later,

Mr. and Mrs. Heffernan left for

an afternoon train for the mountains.

Mr. and Mrs. Corwall returned last

Monday from a week's trip—running

the gondola up the Spokane and

the cities of Montana.

Also Hope West, of Wetaskiwin,

who has been studying music and

singing at the Toronto Conservatory

for the past six months, has arrived.

The tea party buffet luncheon

was served, speeches made and

headings given.

Mr. and Mrs. Saunders returned from

his trip round the world. Mrs. Saunders

had a pale blue lingerie frock with

white plaid and cuffs.

ARRIVALS.

Miss Dorothy Dixie, who has been

visiting the bride and groom, Mr.

and Mrs. Tupper, near Stony Plain,

returned home last week.

The tea party buffet luncheon

was served, speeches made and

headings given.

Mr. and Mrs. Corwall

were exception-

ally rich and elegant. Among

the many were a cabinet of silver from

the bride and groom; a silver tea and coffee service and tray from the parents of the bride; a silver cigarette holder; a set of cut glass; beautiful brasses; silver spoon; numerous sets of spoons; a picture of old blues; most artistic creation.

That hat worn with this much ad-

ditions was a masterpiece.

On their return, Mr. and Mrs.

Heffernan will occupy suite 27 in the

Arlington Block.

SAUNDERS-GRIMM Wedding.

Wednesday morning also witnessed

the nuptials of Miss Edna Grimme

and Mr. Cecil Sutherland at All

Saints Church, corner of 10th and

11th streets, officiating.

Before the hour set for

the ceremony the many guests, num-

bering 150, gathered in the church

in interest expectancy. The church

was prettily decorated.

The little bride, who was given away by

Rev. T. M. Jackson, was a very

charming girl, her beautiful streak

of ivory white dress, satin, heavily

embroidered with French knots, white

ribbon taffeta, silk, chiffon

with ricks and sleeves and veil of real

white lace.

On their return, Mr. and Mrs.

Heffernan will occupy suite 27 in the

Arlington Block.

Heffernan-Graves Wedding.

Wednesday morning also witnessed

the nuptials of Miss Edna Gravé

and Mr. W. S. Heffernan

at All Saints Church, corner of 10th and

11th streets, officiating.

with ricks and sleeves and veil of real

white lace.

On their return, Mr. and Mrs.

Heffernan will occupy suite 27 in the

Arlington Block.

Heffernan-Graves Wedding.

Wednesday morning also witnessed

the nuptials of Miss Edna Gravé

and Mr. W. S. Heffernan

at All Saints Church, corner of 10th and

11th streets, officiating.

Before the hour set for

the ceremony the many guests, num-

bering 150, gathered in the church

in interest expectancy.

The church was prettily decorated.

The little bride, who was given away by

Rev. T. M. Jackson, was a very

charming girl, her beautiful streak
